

News from the Stars ☉ 9

OR, AN

EPHEMERIS

For the YEAR, 1685.

WITH

*Astrological Judgements upon the Eclipses,
Solar Ingresses, and Configurations of Heaven
happening therein.*

being the first, since the Bissextile or Leap-year.

And from the Creation of the WORLD

5634 Years.

WHEREIN

You have an Account of what seems portended by
the Heavens to be manifested in the WORLD in
the said Year.

By WILLIAM ANDREWS,

Student in *Astrology*.

Sine ope divina nihil valeamus.

L O N D O N,

Printed by A.G. for the Company of Stationers, 1685.

Origanus pag. 399. de
utilitate Astrologiæ.

Uti si vita nostra abunde testatur, Astrologia summe utilis esse: quippe ad præcavendum, quæ ob futura, assequendum, quæ profutura sunt, maximam vim obtinet; ut quæ doceat, præcognoscere mutationes, quæ in his inferioribus eveniunt: item quæ in corporibus videntur secundum sanitatem, aegritudinem ac mores eveniunt. At tandem in his contingunt, quibus ut alimentis ad vitam tuendam & medicamentis ad sanitatem procurandam, utimur. Ad id quod Astrologia in piis orationem & pietatis studium excitet; quandoquidem mala, quæ ab astris significantur, non sunt edicta prætoria, sed vitæ & declinari plerumque precatione & studiis possunt. Effici quoque ut res, si velle moderatius ferantur, nec repentino insultu perturbentur, ne deficient animæ: secundæ vero non nimium insistentes nos reddant. Prævisa enim bona non faciunt naturæ aliis intolerabilem. & amicis ac affinitatibus molestam. Ad extremum summi in voluptatem in humanis mentibus concitat. Nihil enim jucundius est animo bellis voluptatibus non corrupto, quam mirabiles effectus horum in his inferioribus corporibus cognoscere.

The Oriental and Occidental Rising and Setting
of the Planets before and after the Sun

Epistologice. 1681

Saturn is a Morning Star, rising before the Sun, from
A South beginning of this year, until the 21 of Feb.
about the beginning an Evening Star, and finish after
the Sun's equinox down, until the 2 of September, and
from thence. He is again a Morning Star to the years
1600, 1610, 1620, 1630, 1640, 1650, 1660, 1670, 1680, 1690, 1700, 1710, 1720, 1730, 1740, 1750, 1760, 1770, 1780, 1790, 1800, 1810, 1820, 1830, 1840, 1850, 1860, 1870, 1880, 1890, 1900, 1910, 1920, 1930, 1940, 1950, 1960, 1970, 1980, 1990, 2000, 2010, 2020, 2030, 2040, 2050, 2060, 2070, 2080, 2090, 2100, 2110, 2120, 2130, 2140, 2150, 2160, 2170, 2180, 2190, 2200, 2210, 2220, 2230, 2240, 2250, 2260, 2270, 2280, 2290, 2300, 2310, 2320, 2330, 2340, 2350, 2360, 2370, 2380, 2390, 2400, 2410, 2420, 2430, 2440, 2450, 2460, 2470, 2480, 2490, 2500, 2510, 2520, 2530, 2540, 2550, 2560, 2570, 2580, 2590, 2600, 2610, 2620, 2630, 2640, 2650, 2660, 2670, 2680, 2690, 2700, 2710, 2720, 2730, 2740, 2750, 2760, 2770, 2780, 2790, 2800, 2810, 2820, 2830, 2840, 2850, 2860, 2870, 2880, 2890, 2900, 2910, 2920, 2930, 2940, 2950, 2960, 2970, 2980, 2990, 3000, 3010, 3020, 3030, 3040, 3050, 3060, 3070, 3080, 3090, 3100, 3110, 3120, 3130, 3140, 3150, 3160, 3170, 3180, 3190, 3200, 3210, 3220, 3230, 3240, 3250, 3260, 3270, 3280, 3290, 3300, 3310, 3320, 3330, 3340, 3350, 3360, 3370, 3380, 3390, 3400, 3410, 3420, 3430, 3440, 3450, 3460, 3470, 3480, 3490, 3500, 3510, 3520, 3530, 3540, 3550, 3560, 3570, 3580, 3590, 3600, 3610, 3620, 3630, 3640, 3650, 3660, 3670, 3680, 3690, 3700, 3710, 3720, 3730, 3740, 3750, 3760, 3770, 3780, 3790, 3800, 3810, 3820, 3830, 3840, 3850, 3860, 3870, 3880, 3890, 3900, 3910, 3920, 3930, 3940, 3950, 3960, 3970, 3980, 3990, 4000, 4010, 4020, 4030, 4040, 4050, 4060, 4070, 4080, 4090, 4100, 4110, 4120, 4130, 4140, 4150, 4160, 4170, 4180, 4190, 4200, 4210, 4220, 4230, 4240, 4250, 4260, 4270, 4280, 4290, 4300, 4310, 4320, 4330, 4340, 4350, 4360, 4370, 4380, 4390, 4400, 4410, 4420, 4430, 4440, 4450, 4460, 4470, 4480, 4490, 4500, 4510, 4520, 4530, 4540, 4550, 4560, 4570, 4580, 4590, 4600, 4610, 4620, 4630, 4640, 4650, 4660, 4670, 4680, 4690, 4700, 4710, 4720, 4730, 4740, 4750, 4760, 4770, 4780, 4790, 4800, 4810, 4820, 4830, 4840, 4850, 4860, 4870, 4880, 4890, 4900, 4910, 4920, 4930, 4940, 4950, 4960, 4970, 4980, 4990, 5000, 5010, 5020, 5030, 5040, 5050, 5060, 5070, 5080, 5090, 5100, 5110, 5120, 5130, 5140, 5150, 5160, 5170, 5180, 5190, 5200, 5210, 5220, 5230, 5240, 5250, 5260, 5270, 5280, 5290, 5300, 5310, 5320, 5330, 5340, 5350, 5360, 5370, 5380, 5390, 5400, 5410, 5420, 5430, 5440, 5450, 5460, 5470, 5480, 5490, 5500, 5510, 5520, 5530, 5540, 5550, 5560, 5570, 5580, 5590, 5600, 5610, 5620, 5630, 5640, 5650, 5660, 5670, 5680, 5690, 5700, 5710, 5720, 5730, 5740, 5750, 5760, 5770, 5780, 5790, 5800, 5810, 5820, 5830, 5840, 5850, 5860, 5870, 5880, 5890, 5900, 5910, 5920, 5930, 5940, 5950, 5960, 5970, 5980, 5990, 6000, 6010, 6020, 6030, 6040, 6050, 6060, 6070, 6080, 6090, 6100, 6110, 6120, 6130, 6140, 6150, 6160, 6170, 6180, 6190, 6200, 6210, 6220, 6230, 6240, 6250, 6260, 6270, 6280, 6290, 6300, 6310, 6320, 6330, 6340, 6350, 6360, 6370, 6380, 6390, 6400, 6410, 6420, 6430, 6440, 6450, 6460, 6470, 6480, 6490, 6500, 6510, 6520, 6530, 6540, 6550, 6560, 6570, 6580, 6590, 6600, 6610, 6620, 6630, 6640, 6650, 6660, 6670, 6680, 6690, 6700, 6710, 6720, 6730, 6740, 6750, 6760, 6770, 6780, 6790, 6800, 6810, 6820, 6830, 6840, 6850, 6860, 6870, 6880, 6890, 6900, 6910, 6920, 6930, 6940, 6950, 6960, 6970, 6980, 6990, 7000, 7010, 7020, 7030, 7040, 7050, 7060, 7070, 7080, 7090, 7100, 7110, 7120, 7130, 7140, 7150, 7160, 7170, 7180, 7190, 7200, 7210, 7220, 7230, 7240, 7250, 7260, 7270, 7280, 7290, 7300, 7310, 7320, 7330, 7340, 7350, 7360, 7370, 7380, 7390, 7400, 7410, 7420, 7430, 7440, 7450, 7460, 7470, 7480, 7490, 7500, 7510, 7520, 7530, 7540, 7550, 7560, 7570, 7580, 7590, 7600, 7610, 7620, 7630, 7640, 7650, 7660, 7670, 7680, 7690, 7700, 7710, 7720, 7730, 7740, 7750, 7760, 7770, 7780, 7790, 7800, 7810, 7820, 7830, 7840, 7850, 7860, 7870, 7880, 7890, 7900, 7910, 7920, 7930, 7940, 7950, 7960, 7970, 7980, 7990, 8000, 8010, 8020, 8030, 8040, 8050, 8060, 8070, 8080, 8090, 8100, 8110, 8120, 8130, 8140, 8150, 8160, 8170, 8180, 8190, 8200, 8210, 8220, 8230, 8240, 8250, 8260, 8270, 8280,

March is a *Morning Star*, from the beginning of
 the year until the 18 day of May, then He becomes
 an *Evening Star*, and so continues to the year's end.
 April is a bright and glittering *Morning Star*, from
 the beginning of this year, until the 17 day of June,
 then He becomes a bright *Evening Star*, shining
 brilliantly after the sun, going down to the end
 of the year.
 May is an *Evening Star*, from the beginning of
 the year until the 5 of February, then He becomes a
Morning Star, until the 16 day of April, then He is an
Evening Star, again, until the 9 of June, when a
Morning Star appears until the 29 of July, then He be-
 comes an *Evening Star*, until the 6 of October, when a *Morning Star*
 appears until the 28 of November, and from thence an *Even-
 ing Star* to the year's end.

Number of Direction.	25			25	0

The Use of the Two ensuing Tide-Tables

To find the time of Full Sea, or High Water in any of those places mentioned in the two ensuing Tide-Tables you must observe, First, the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moons Age every day throughout this Year, 1685. And having therein found out the Moons Age, according to those directions mentioned for that purpose, in the side of the said Table: Then have recourse unto the said Tide-Tables, and look for the place desired, in the Head of the said Table, with the Age of the Moon, in the Column under the Title of the Moons Age, and in the common Angle, or Meeting of those Lines, in the Col. under your place, you shall have the time of High Water in hours and minutes.

Yet Note, that the Tides do not always fall out exactly to the time found in these Tables, by reason of the difference of the Moons Latitude, High Winds, Land-flows, &c. which very often alter the time, yet this is the exactest Rule that can generally be given for the finding of them.

A TABLE of the Moons Age every day throughout this Year, 1685. whereby with the help of the ensuing Tide-Tables, the time of High-Water and Full Tide may be found in those places there inserted.

Mercer's Observations, 1685.

2 day at 11 before noon Saturn.

11 day at midnight Jupiter.

The 15 day at 10 in the morn. Mars is with the

22 day at 10 at night Venus.

23 day at 1 in the morn. Mercury.

The Aspects of the Stars in this Month, are of various signification; And the Heavenly Bodies at this time import very much as touching human Transactions, and also as unto the Weather. Here is an Opposition of Saturn and Venus, and of Saturn and Mercury; two Conjunctions of Venus and Mercury, a Quartile of Mars and Venus, of Mercury and Mars, and of Saturn and Mars; and also an Opposition of the Sun and Jupiter.---A month of much industrious Business, and sundry Actions of consequence, are upon the stage of the world---many Rumors and Discourses of the Affairs of some Nations, and places under Virgo, Sagittary and Pisces---and some Battle or Skirmishes where Armies are near---and some Ships at Sea seem in danger, dubious advice arrives from some Neighbor-Nations---Hot Disputes and Controversies in some Countries Southward and South-East. Heats and Animosities amongst Men in some part of France, Spain, Portugal, Hungary, Dalmatia, and the Ottoman Territories seem now all concerned; and also some places nearer hand. Many heavy Storms in this Month; and much unsettled weather in many places.

1685.

first quarter the 2 day, about 2 in the morning.

Full MOON the 9 day, at 3 in the morning

Last quarter the 15 day, 20 min. past 5 at night.

East quarter the 13 day, 20 miles from
New Mobay 12 1/2 miles from the point of intersection

Mercury is now Stationary for a few days, and then becomes *direct* in Motion, and there are many Conjunctions of important in this Month, viz. *the* *Planet* of Saturn and *Mars*, of the Sun & *Saturn*, an Opposition of *Mars* and *Mercury*, and *Mars* Sol, &c. — A bustling in Divers places and some warlike Matters seem now under Mature Consideration; or carried on in Earnest. — Much Sickness also, or some violent Diseases, seem to Afflict Mankind: and some places seem sensible of sundry Inconveniencies, occasioned by Armies, and rains, and unruly Attempts — The *Astrol* and Negotiations of this Month in some Countries, seem rough and uneasy, Battles, Fights, Duels, Quarrels, Robberies, sudden Fires, &c. in some places — Many thwarting passages, and the Affairs of some People meet with Obstructions, and things of great Moment seem now in Hazard in many parts of Europe, and also in Asia — Gods preserve and keep the City of London in Health and Prosperity, now and Evermore, Amen. — Various Weather in this Month: *Hazy Storms*, *Heat* and *Rain* now and then therein; with *Noisy* *Claps* of *Thunder*, &c. in some places —

JUNE'S Observations, 1685.

The { 1 Day at 8 at Night, *Jupiter*
 5 Day at 4 in the Morning, *Mars*
 20 Day at 1 in the Afternoon, *Mercury* } is with the *Moon*.
 21 Day at 9 at Night, *Venus*
 26 Day at 8 at Night, *Saturn*
 29 Day at 5 in the Morning, *Jupiter*

Here will be in this *Month* two *Eclipses*, viz. one of the *Moon* in the 26th. degree of *Sagittary*, on the 6th. Day about 6 of the Clock at Night; but not to be seen by us, because the *Moon* at the time thereof is not in our *Horizon*. The other is of the *Sun*, on the 21st. day at 8 of the Clock at Night, in the 10th. Degree of *Cancer*: 'twill be but a small *Eclipse*, and in regard the *Sun* is just setting, 'twill hardly be visible here --- The Portents of the *Celestial Bodies* in *May* past, will in some measure, shew forth themselves in this *Month* --- And much of what was then by them portended now appears in divers places, under the *Constellations* of *Heaven*, wherein they happened --- About the middle thereof, *Mars* by his *Retrograde motion*, comes into *Scorpio*: but towards the *Later end*, he becomes direct in *Marriou* --- Martial undertakings, and various proceedings in many parts of the World seem still continued, and some hot disputes, and controversies --- Sundry Debates in some places of some weighty concerns; and some thing relating unto Religious matters, &c --- The *Irascible* part of *Man* seems stirred up & some forraign Countries seems is an unsettled posture. If some places under *Germany*, and alio under *Virgo*, and *Sagittary* be now free from Troubles, 'twill be well ---
 Indifferent good *Weather* almost all this *Month*. B 2 July

1685.

JULY'S Observations, 1685.

{ 2 Day at 8 In the Morning, *Mars*
 20 Day at 1 In Afternoon *MERCURY*,
 22 Day at 6 In the Mornlag, *VENUS*
 24 Day at 6 In the Morning, *Saturn*
 26 Day at 4 In the Afternoon, *Jupiter*

These } is with the Moon.

THough the *Influence* of *Mars* at this time seems very Rough, and many things of this Nature appears in the World—Yet the *Constitutions* in this *Month* are very Material, and the Actions thereof signified by them, seem to be more Calm then in some Months past; for the *Sun* applies to a *Trine Aspect* of *Mars*, and *Sextile* of *Jupiter*, and so doth *Venus* and *Mercury*, as if the present Negotiations of many places, would now be carried on with much Moderation: and the Spirits of People in the General pretty quiet, notwithstanding all former proceedings—Great endeavours seem on Foot for the Composing of Differences, and Ambassadors employed for the reconciling of *National* Controversies, and the Publique Businesses of the whole Month, may prove pretty acceptable unto many places; Notwithstanding all Reports and Fears to the contrary: However, some *Violent Diseases* may appear very rife in some places, and *Martial* and *Saturnian* Distempers—

Good Weather generally in this Month.

1685.

August hath xxxi Days.

Full Moon, the 4 day, 44 min. past 9 before Noon.

Last Quarter, the 11 day, 40 minutes past Mid-Night.

New Moon, the 19 day, 13 minutes past 10 at Night.

First Quarter, the 26 day 21 minutes past 9 at Night.

AUGUST'S Observation, 1685.

{ 20 Day at 8 at Night, *Saturn*
 21 Day, at 8 in the Morning, *Venus*
 The { 21 Day at 11 before Noon, *Mercury* is with the *Moon*.
 { 23 Day at 5 in the Morning, *Jupiter*
 { 27 Day at 10 before Noon, *Mars*

THis Month of *August*, may prove a Month of Variety of Action, in some Countries beyond the Seas— There is herein, a *Conjunction* of *Saturn* and *Venus*, of *Saturn* and *Mercury*, and of *Venus* and *Mercury* in *Virgo*; and a *Quartile* of *Venus* and *Mars* of *Mercury* and *Mars*, and of *Saturn* and *Mars* in *Virgo*, and *Sagittary*— Various reports touching the Affairs, and Actions of some Places, under the two before-mentioned *Signs*; and some Considerable *Martial* undertakings seem carried on in some-foreign Countries—Fights, Quarrels, Contentions, many Consultations, &c. Some People seem of a Rash Hasty, and Chollerick Disposition: others seem Melancholly, and discontented— An appearance of much Action in *Hungary*, *Dalmatia*, and the *Ottoman* Countries, &c.— Where some Battle, or Skirmishes may be expected. *France*, and *Spain*, are also at this time hinted at by the Stars; & seem full of Business, and sundry other Places: and much News arrives from several parts of the World, relating matters of Consequence—

The *Weather* will be *now* and *then* *Windy*, and somewhat *unsettled* in this *Month*; and some *Notable Storms* in some Places, will happen therein.

1685. September hath xxx. Days.

SEPTEMBER'S Observations, 1685.

These	18 Day at 10 before Noon, <i>Saturn</i>	} it with the <i>Mon.</i>
	19 Day at 10 at Night, <i>Jupiter</i>	
	20 Day at 5 in the Morning, <i>Mercury</i>	
	20 Day at 7 in the Morning, <i>Venus</i>	
	24 Day at 11 at Night, <i>Mars</i>	

THE *Heavenly Bodies* are now in a very active posture, and there are no less then five *Conjunctions* of the *Planets* in this *Month*, viz. a *Conjunction* of the *Sun* and *Saturn*, two *Conjunctions* of *Jupiter* and *Mercury*, a *Conjunction* of *Jupiter* and *Venus*, and a *Conjunction* of *Venus* and *Mercury*; besides, here happens a *Quartile* of the *Sun* and *Mars*, at the *Suns* entrance into *Libra*—Many Matters of weighty Concernment now seem Consulted of; and near Manifestation in Divers Places, and *Austria*, *Livonia*, *Alsacia*, and some other places under *Libra*, as well as some under *Virgo* and *Capricorn*, seem now sensible of Troubles, occasioned by the Motion of *Arminies*, &c.—Much Discourse about the present Transactions of the *Germans*, *French*, *Turks*, and other Nations. Peoples Minds in some places seem somewhat uneasie—Humane Actions many, and of Divers Natures—However, some Merchants receive a good Account of their Ships at Sea, and many Ships come Richly Home to the Content of the owners.

Cold and Cloudy Weather, &c. at the beginning of this *Month*, the rest of the *Month* will be reasonable enough.

October

Full Moon, the 1 day, 39 min. past 10 bet re Noon
 Last quarter, the 10 day, 33 Minutes past After noon.

New Moon, the 17 day, 48 min. past 8 t Night

First quarter, the 24 day, 3 min. past 0 before Noon.

OCTOBER'S OBSERVATION, 1685.

{ 15 Day at 1 in the Morning, *Saturn*,
 16 Day at 5 at Night, *Mercury*
 The { 17 Day at 8 at Night, *Jupiter*
 { 20 Day at 4 in the Morning, *Venus*
 { 23 Day at 2 in the Afternoon, *Mars*

is with the *Moon*.

Jupiter is just come into *Scorpio*, and theré is now a *Conjunction* of the *Sun* and *Him* the *ein*: and *Mars* having in the other Month last past left *Sagittary*, and entred *Capricorn*, passeth now suddenly out of the same into *Aquarius*: but before *He* leaves that Sign, *He* comes to a *Trine* of *Saturn* — It is probable, that the Effects of the many late *Conjunctions* of the *Planets* in *September* past, will operate in this Month; and sundry parts of the World, will be in one kind or other, sensible of their Portents: which (perhaps) may be of a Propitious Nature unto some places — Yet, there is much Talk about the present Consultations, and Designs of some *European* Nations: and many things are under Debate — However, some People seem Labouring for Peace, and do heartily desire it — Several Agents, or Ambassadors are now sent from one Nation to another, and at this time something more then ordinary, seems either in action, or Council: and many Negotiations seem very earnestly Agitated in some places beyond the Seas —

Good Weather almost all this Month.

November

1685.

November hath xxx. Days.

Astrological Judgments

For the Year 1685.

By William Andrews, Student in Astrology.

Caeli enarrant gloriam Dei.

THE Conjunction of Saturn and Mars in Virgo, in October, 1684. and the Eclipse of the Moon in the first Degree of Cancer, in December therein, ought here at this time to be considered; seeing that their Effects will operate at the beginning of this Year, 1685. and seem very considerable — The last Conjunction of Saturn and Mars in Virgo,

Virgo, was in September, 1656. now above 28 Years since; whose Effects, did very much appear in several places of the World under that Constellation; and so will the Effects of the before-mentioned late Conjunction in *October*, 1684. and the Eclipse of the Moon in December aforesaid, being great, and the Moon very considerably Eclipsed; the Portents thereof will in one kind or other (in the Months of *January*, *February*, and *March*, of this present Year, 1685.) very much concern those People and Places, that be under the Sign *Cancer*, the Moons place in the Heavens, at the time of her said Eclipse.

The Sign *Virgo*, wherein the aforesaid late Conjunction of *Saturn* and *Mars* happened, is the House of *Mercury*: Therefore the said Conjunction seems to be of a busy nature, and to import many various Actions in the World; much Fraud, Deceit, and Dissimulation; crafty Counsels, and Enterprizes; fraudulent Dealing among Men, Conspiracies, Wranglings, and Contentions; Wars and Controversies in some Countries beyond the Seas, under the aforesaid Sign, and *Pisces* the opposite Sign thereunto; and many difficulties in their publick Affairs and Negotiations: and as the Sign *Virgo* aforesaid, is of the *Barbary* *Trigon*, so the said Conjunction seems further to import, a scarcity or dearth of Corn in some Places, or that it will be dearer than in some Years past, and that the Fruits of the Earth will not be so plentiful as formerly: and that in some place or places under the said Sign, or its aforesaid opposite Sign, some sudden motion of the Earth may disturb and afflict some People.

The aforesaid Eclipse of the Moon Being in *Cancer*, it doth seem to import, matter of much Action in the *West-Indies*, both by Sea and Land; and in the *Turkey* Dominions—The most considerable Effects of this Eclipse, which will happen in *Europe*, will fall out betwixt the *Turkish* and *Venetian* Fleets at Sea; it signifieth breach of Leagues among watery People, loss to the *Hollanders* at Sea, or by Inundations, or Distempers amongst them; as also to Watermen, Seamen, and Fishermen. Naval Fights or preparations at Sea in the North Parts—Some *Astrologers*

affirm

affirm, that also after an Eclipse of the Moon in Cancer, *In fratribus quando colliguntur & conservantur, putredo accidet,* &c. There happens a rottenness or decay of Fruit that are gathered, upon which man feeds, breeding Diseases in the Bodies of those that eat them, Death unto the common People, unruly and hasty Actions and Passages; Scarcity of Sea Fish, and that which is taken not very good, much Cold, too many Showres, or too much Rain, from whence scarcity follows—Yet, the place of the said *Lunar Eclipse*, being but in the very beginning of *Cancer*, viz. in the *first Degree* and *6th* minute thereof, its Effect (perhaps) will not be of so much concernment unto those Places, Men and things under that *Constellation*, as if it had been in further, and more Degrees of that Sign.

The position of *Saturn* in the *Ascendant* at the time of the aforesaid *Eclipse*, (and he then Lord of the *6th* House) seems much to be disliked; his presence therein, being of a melancholy and uncomfortable signification, whose Effects will appear in the aforesaid Months of *January*, *February* and *March*; or *Spring* time of this Year, 1685, many People in divers Places about those times, will be much afflicted in their Bodies by Agues, Colds, Coughs, Consumptions, gripings in the Guts, and other Infirmities, more than Ordinary—Besides, *Mercury* the then *Lord* of the *Ascendant*, being then *Retrograde*, and *conjunction* of the *Sun* and also in *Opposition* of the *Moon*, in the time of her said *Eclipse*: Sickness unto many People seems thereby signified; Cold, and sharp Weather, or much Snow; great storms both at Sea and Land; loss and detriment to Merchants, and Navigators, at Sea by boisterous Weather—The aforesaid *Eclipse* it self, and *Position*, and *Configurations* of the Stars, at the time thereof, seeming of an unpleasant Importance, in divers respects, unto Mankind—

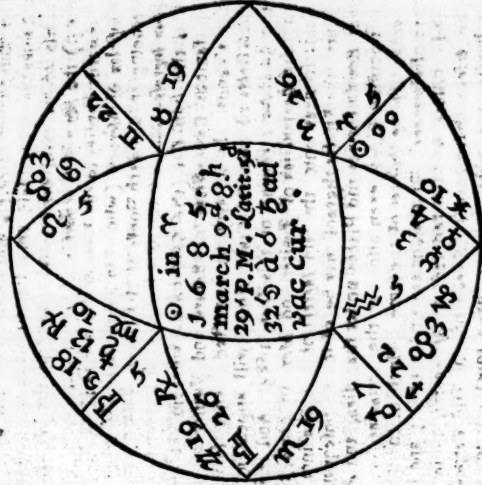

The Day before the said *Lunar Eclipse*, the *Sun* enters *Capricorn*, at which time the Heavens are posited, as in the foregoing *Scheme*, viz. 19 Degrees of *Leo* *Ascends*, and the beginning of *Taurus* Culminates; *Saturn* being then in the 17th Degree of *Virgo*, in

Astrological Judgments

the second House, *Jupiter* in the 19th, and *Mars* in the 23th Degree of *Libra*, in the third House (having been in *Conjunction* in the said Sign, not long before the said ingress of the Sun, viz. on the 30th Day of *November*, 1684.) the Moon is in *Quartile Aspect* of *Saturn*, and then afterwards applies to the *Trine* of *Jupiter*, and *Mars*, and *Opposition* of *Mercury* (who is in *Conjunction* with the Sun) she being in the 11th House of the Heavens, at the said *Solar Ingress* —

As the sign *Leo* (the *Constellation* wherein the three late famous *Conjunctions* of *Saturn* and *Jupiter* happened) ascends, so it may be expected, that some of the Effects of the said *Conjunctions*, will appear in the World at the beginning of this Year, 1685. And seeing, that the *Conjunction* of *Jupiter* and *Mars* in *Libra*, happened so near unto the said *Ingress* of the Sun into *Capricorn*, the Effects thereof may be of some Consequence, unto the Countries and Places under that Sign, and *Aries* its opposite Sign; even also, at the beginning of this Year, or *Spring Quarter* of the same. Much of the Emperour of *Germany's* Dominions are under *Libra*; and *Denmark*, *France*, &c. are reputed by *Astrologers*, to be under *Aries*; therefore the Effects of the said *Conjunction* of *Jupiter* and *Mars*, seems to have much relation unto these Countries, and sundry others under those two aforesaid *Constellations*, viz. *Libra* and *Aries*; and if they prove of a peaceable, and mild nature, 'twill be well; for *Mars* being in his Detriment in *Libra*, his influence seems to be of a rough disposition. But I come to the *Ingress* of the Sun into *Aries*, this present Year, 1685 —

for the year 1685.

At which time, seeing there is a *moveable Sign* ascending, I shall also treat (according to the rule of *Hilly Bonatus*, &c.) of the other *Quarterly Solar Ingresses* of this Year, as they come in order.

This present *Ingress* of the Sun into *Aries*, is attended with some very material *Configurations of Heaven*, and some of them such, as are of no very benevolent nature, for there happens presently after the said *Ingress*, a *Quartile Aspect* of *Mars*, *Venus*, and *Mercury*; an *Opposition* of *Saturn* and *Venus*, and of *Saturn* and *Mercury*; then a *Conjunction* of *Venus* and *Mercury*; and on the 23th of *March* (13 Days after the said *Ingress*) a *Quartile* of *Saturn* and *Mars* in *Virgo*, and *Sagittary*—— And on the 27th Day of the same Month, an *Opposition* of the Sun

Astrological Judgments

Sun and Jupiter in Aries, and Libra—— All which being duly observed, seem very significant as unto *Mundane Transactions*, and the state and temper of the Weather in the *Spring Quarter* this Year.

At the *Sun's* entrance into *Aries*, 26 Degrees of *Libra* ascends, and the 5th Degree of *Leo* is on the Cusps of the *Medium Caeli*: The two *Superiour Planets*, *Saturn* and *Jupiter* are *Retrograde*; the one in the 13th Degree of *Virgo* in the 11th House, the other in the 19th Degree of *Libra* in the 13th (for *Jupiter* being above 5 Degrees from the Cusps of the *Ascendant*, he cannot be admitted into that House:) *Mars* is in the 7th Degree of *Sagittary* in the 3d House, *Venus* and *Mercury* are in the 4th, the *Sun* in the 6th, and the *Moon* in the 11th, separating from the *Conjunction* of *Saturn*, and afterwards *void of Course*. Thus are the *Heavenly Bodies* disposed, at the said *vernal Revolution* this Year, 1685. as may be seen by the last foregoing Scheme ——

As the two *Superiour Planets Saturn* and *Jupiter* are *Retrograde*, as aforesaid, at this *Revolution*: So their influence seems not very propitious unto Mankind; for a Planet *Retrograde* (according to *Beithem's Centilequium*) is as a Man infirm, stupified, and solicitous: and seeing that *Saturn* and *Jupiter*, are the highest Planets in the Heavens, and their influence of greatest consequence, so this their present *Retrogradation* seems the more to be considered, as having much relation unto those Countries, Matters, Men, and Things signified by them —— and seeing there happen so many notable *Aspects* of the Planets, as aforesaid, at this said *Revolution*; much Action in many parts of the World from thence seems portended, and that it will be a time of much business in many Countries —— and because most of the said *Aspects* are of a thwarting nature, so there seems thereby imported, many difficulties to happen in the publick Affairs, and Transactions of some foreign Countries, and that many Martial undertakings will appear in sundry Places beyond the Seas, in this *Spring Quarter* of this Year, 1685. and afterwards —— which seems

seems more strongly confirmed by the *Quadrate Aspect* of *Saturn* and *Mars* at this aforesaid *Ingress* of the *Sun* into *Aries*: and indeed, the long and tedious transit of *Mars* through the sign *Sagittary* this Year, seems of no good importance unto those Places that are subject unto the said *Sign*, and *Gemini* its opposite *Sign*. For the truth is, *Mars* is no less than seven Months in that *Constellation* this Year, viz. from about the 18th Day of February, until about the 11th Day of September, (as I have hinted in my *Month's Observations*) so that this his long continuance in the said *Sign*, seems much to be disliked, and is of somewhat a sturdy signification, and doth seem very much to concern *Spain*, *Dalmatia*, *Hungary*, *Sclavonia*, *Moravia*, *Messia*, *Celtica*, *Arabia* the happy; and those Cities and Towns, viz. *Toletum*, *Vallaterras*, *Muriam*, *Narbonne*, *Avenion*, *Cellonia*, *Agrippina*, *Strasbourg*, *Rosenberg*, *Buda*, &c. (as being (as Astrologers say) under the sign *Sagittarius*, wherein the said Planet *Mars* makes his aforesaid long transit this present Year ---- Nor do these said Places seem only now concerned by this said position of *Mars* in *Sagittarius*, at this said vernal *Ingress*: but those likewise, that are under *Gemini* the opposite sign thereunto, (as I have said before) which *Astrologers* tell us in their Writings, are these, viz. *Sardinia*, part of *Lombardy*, *Flanders*, *Brabant*, the Dukedom of *Wirtemberg*, *Hircania*, *Amazonia*, *Cyrenatica*, and *Aegypt* the lower: and the Cities and Towns, viz. *London*, *Corduba* in *Spain*, *Turin*, *Vercella*, *Louvain*, *Bruges* in *Flanders*, *Meguntia*, *Blumberg*, *Nürnberg*, *Halsid*, &c. Moreover, those that are under *Virgo*, will be sensible also, of the Effects of the aforesaid *Quadrate* of *Saturn* and *Mars*, and of the present transit of *Saturn* in that sign, as *Achaia*, *Greece*, *Cret*, *Corinthia*, *Antibes*, a part of *Gallia Comata*, a part of the *Rhine*, *Silesia* the lower, *Misopontia*, *Babylon*, *Affrica*: These *Cities*, and Towns, *Jerusalem*, *Corinth*, *Nivaria*, *Cuma*, *Bundusium*, *Papia*, *Tholuse*, *Lyons*, *Paris*, *Basil*, *Heidelberg*, *Erbord*, *Vranstavia*, &c. ---

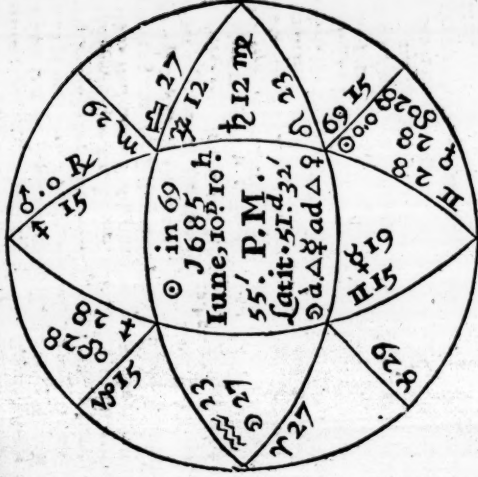

I do proceed and say, That soasmuch as *Venus* and Mercury,

Astrological Judgments

Mercury, are at this said *Revolution* of the *Sun*, afflicted, first, by the *Quadrature* of *Mars*, and then by the *opposition* of *Saturn* as aforesaid: It seems to denote, many turnings and windings in the affairs of those People, that are signified by the said Planets; and that they will be sensible of troubles in their Bodies and Estates. It imports Diseases unto the common People, and Female Sex, loss unto Merchants and Tradersmen, clandestine Practices, many Robberies, and much thieving at Land, pyratrical Actions at Sea, and detriment to Seamen; (for *Venus* and *Mercury* are in *Pisces*) and much wet and moist Weather, now and then, in the *Spring* time of this Year, in divers places; and in regard, that *Venus* is in *Conjunction* with *Mercury*, in the aforesaid Sign, it seems to denote, that in this said *Spring Quarter* of this Year, some Persons will be much inclined to Navigation, and to be conversant in Sea Affairs—and seeing the *Sun* quickly after his said *Ingress* into *Aries*, comes to the *Opposition* of *Jupiter*, the Effects thereof will shew forth themselves in the Months of *April* and *May* of this Year, in the places of the World under *Aries* and *Libra*; which *Astrologers* affirm, are *France*, *Denmark*, *Germany*, *Sweden*, and several other Places, some more remote, and some nearer hand, wherein many Persons of Eminency may be concerned, and many weighty transactions on foot: which we wish may prove calm and serene — The truth is, the signs *Aries* and *Libra*, are two *Cardinal* signs, therefore, when the *Sun*, and any of the *Superiour Planets*, happen to have any *Conjunctions* or *Oppositions* in them, they are the more to be regarded, and have the greater signification: besides, the *Sun* is exalted in *Aries*, in the 19th Degree thereof, and *Aries* is a sign of the *Fiery Triplicity*, and *Libra* of the *Aiery*, being the two noblest *Triplicities* of the four: and the *Sun* and *Jupiter* are Planets of themselves, of very great force in the Heavens, and have relation here on Earth, unto no mean or trivial things: Therefore, the *Opposition* of these two Planets at this time, seems very considerable — and so I proceed to the position of *Heaven*, at the *Sun's* entrance into *Cancer* this Year, the *Schemes* whereof doth here follow —

Wherein

for the year 1685.

Wherein we have the 23th Degree of *Aquarius*, on the Cusp of the *Ascendant*, and the 15th Degree of *Sagittarius*, in the *Medium Cæli*. The two *Superiour Planets*, *Saturn* and *Jupiter*, in the 7th House, the one, viz. *Saturn*, in the 12th Degree of *Virgo*, and *Jupiter*, in the 12th Degree of *Libra*; being now both direct in motion: for *Saturn* becomes direct about the third Day of *May* this Year, and *Jupiter* about the 30th Day of the same Month. The *Moon* is in the *Ascendant*, in the 27th Degree of *Aquarius* (and separates from the *Trine* of *Mercury*, who is in the 4th House, in the 19th Degree of *Gemini*:) and she applies to the *Trine* of *Venus*, who is in the 5th House, in the 28th Degree of the said sign. *Mars* is in the 9th House *Retrograde*, just going back into *Scorpio*, out of *Sagittarius*; but a few days after this said *Ingress* of the *Sun* into *Cancer*, he becomes

Astrological Judgments

becomes direct in Motion, and makes his return again in *Sagittary* — In this posture are the *Heavenly Bodies* on the 10th Day of *June* this present Year, at 55 Minutes after 10 of the Clock at Night, when the *Sun* enters *Cancer* — being according to *Astronomical Account*, the beginning of the *Summer Quarter*, the *Sun* then being in his greatest *Northern Declination*, and farthest motion *Northward*, thereby making the longest Day, and shortest Night, to the *Northern Inhabitants* of the Earth —

Four Days before the said *Ingress* of the *Sun* into *Cancer*, this Year, viz. on the 6th Day of *June*, about 6 of the Clock at Night, there will happen an *Eclipse* of the *Moon*, in the 16th Degree of *Sagittarius*; but invisible to us here in *England*, by reason of the *Moon* being then under our *Horizon* (as I have intimated in my *Observation* on that Month;) and also on the 21th Day of the said Month (11 Days after the said *Solstitial Ingress*) about 10 of the Clock at Night, there will be an *Eclipse* of the *Sun* in the 10th Degree of *Cancer*, but this *Eclipse* will be but small, and scarce visible to us, because it happens when the *Sun* is near setting — However, some Effects these *Eclipses* may have, though not visible in these parts of the World.

Although at the *Ingress* of the *Sun* into *Cancer* this Year the Stars seem pretty moderately disposed, yet, many of those matters signified at the *Sun's* ingress into *Aries* above said, will be apparent in many places of *Europe*, in the *Summer Quarter* of this Year, as well as in the *Spring* time of the same; and various Actions and Designs will be carried on in divers parts of the World, as well in *Asia*, as *Europe*, and in some parts of *Africa* too, where the *Yemen* is concerned — and some unquiet proceedings may appear among some People nearer hand: for *Saturn* and *Jupiter*, at this said *Ingress* of the *Sun* into *Cancer*, are in the 7th House of Heaven, being that part of the same, which (*Astrologers* say) hath the signification of Wars, Battles and Controversies: and *Mars* in the 9th House, shew some hot disputes about Religious Concernments in some *Regions* —

for the year 1685.

It cannot be supposed, that the Effects of the late *Comets* are quite over; nor of the three famous *Conjunctions* of *Saturn* and *Jupiter*, formerly mentioned; but that much of them are still remaining to be manifested in the World in some succeeding Years: and it is very probable, that some part of the said *Comets* Effects, will appear in the *Summer Quarter* of this Year — *Comets* (as the Learned have observed) do not appear in vain (as I have heretofore mentioned in my observations on them) though their substance, matter, and generation, is not (as some think) certainly known. The words of the late Learned Sir *George Wharton*, concerning that matter, upon the *Comet* which appeared in 1652 seem very rational — “For my own part (*sic* *be*) in regard of the uncertainty of all other opinions, I willingly incline to that which attributes the Generation and Government of *Comets* to God; or the Intelligence; or to such as reckon them among the Arcana of the World, and the most hidden Miracles of Nature: In which Number are *Messabala*, *Hagecius*, *Rhodus*, *Regiomontanus*, *Tycho*, and many others. Thus He — and of the final cause of *Comets*, he writes thus, viz. “It has been a received opinion in all Ages, that *Comets* are certain funebrious Appearances, secret Fires and Torches of Death rather than of Life, and were ever look’d upon as the threatening Eyes of Divine Vengeance, and the Tongue of an Ireful Deity, portending the Death of Princes, Plague of the People, Famine, and Earthquakes, with horrid and terrible Tempests: and afterwards He proceeds, and quotes the sense of *Fromundus* (a great Metreologer) who after a long discourse thereon (as he very truly observes) concludes with *Ficinus*, *Cometam non esse physicam causam calamitatum, sed signum potius ad placitum Dei, utentis Cometa, licet essetis naturali, ad terrendos, et emendandos alicubi mortales, quomodo usus est ad fructus cum genere nostro significandum; et licet aliquibus fausti quidam Cometa fuerint aut visis sint, non in hunc tamen finem, sed ad tristiora denuncianda mitti, &c.* — That a *Comet* is not a Physical Cause of Calamities, but rather a sign at the pleasure of God, using the *Comet*, although by a natural Effect,

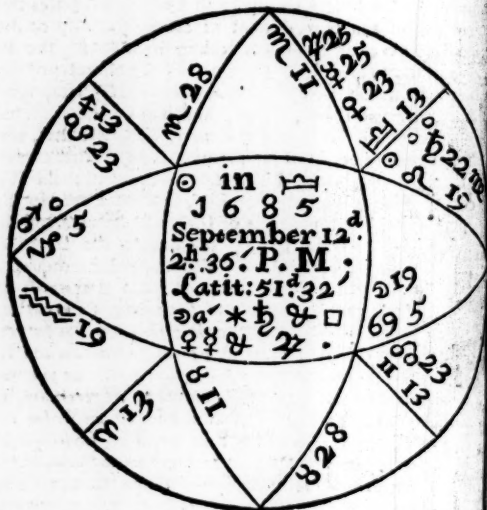

Astrological Judgments

fect, to terrifie and amend Morrals, like as he uses the R-
bow, to signifie the Covenant made betwixt him and M-
kind: And although Comets may be fortunate (or seem
unto some, yet, that they are not sent for that end, but to
nounce more sorrowful things, &c.— In brief, *Virgil*
learned Poet, counting the *Prodigijs* that went before the
vil War after *Cesar's* Death, writes thus, viz.

Non aliàs Cælo ceciderunt plura sereno

Fulgura: nec divi toties arserè Comete.

And so I now come to the position of Heaven, at the Sun's
gress into *Libra*, this present Year, 1685. being the
Sebeme to be herein considered, as being that of the *Autu-*
nal Quarter of this Year—

for the year 1685.

The Heavenly Bodies being then thus disposed, viz. the 5th Degree of Capricorn ascends, and the 11th Degree of Scorpio descends: Saturn is in the 8th House, in the 22th Degree of Virgo, Venus in the 23th, and Jupiter and Mercury in the 25th Degree of Libra, all in the 9th House. Mars is just entered into Capricorn, and is in the 12th House: the Moon is in the 13th, in a Quartile Aspect of Mars, and the Moon in the 7th House, in the 19th Degree of Cancer, applying to a Sextile Aspect of Saturn, and then to the Quadrature of Venus, Mercury, and Jupiter—— There is a Conjunction of Jupiter and Mercury, just at this Ingress of the Sun into Libra; and presently after the same, there happens a Conjunction of Venus with Jupiter and Mercury in the said Sign—— So that the Stars seem in somewhat an active posture, at this Ingress of the Sun into Libra; and many things of pretty eminent consequence, seem by them portended, to happen in sundry parts of the World, in the Autumnal Quarter of this Year; which takes its beginning at the time (according to Astronomers) when the Sun enters into Libra; which falls out this Year, to be on the 12th Day of September, at 36 Minutes past two of the Clock in the afternoon—— and because there is a Quartile of the Sun and Mars, just at this Autumnal Ingress; hasty and cholerick actions, seem thereby signified to appear amongst some People, under the Signs wherein the said Aspect happens, or concerned by them: and some Battels, Duels, Skirmishes, &c. in some Places beyond the Seas, even in this said Autumnal Quarter: and Discauses of a hot and fiery nature, will appear in the same, in divers Places; and malignant Fevers, or Discauses of a pestilential Quality, may be feared—— and the Death of many aged, and Saturnian Persons: and also, loss of the greater sort of Cattel in some Countries, &c.——

There is an Eclipse of the Moon in this Autumnal Quarter, viz. on the last Day of November this Year, near eleven of the Clock at Night; which will be a very great Central and Total Eclipse, and it happens in the 19th Degree of Gemini: Mercury at the time thereof, being in Opposition to the Moon, and Saturn a Quadrant Aspect of Mercury, and both the Luminaries: The Moon being Eclipsed to the quantity of 21 Digis and

Astrological Judgments, &c.

and 45 Minutes, for *Astronomers* (the better to measure the quantity of an *Eclipse*) do divide the *Diameter*, as well of the *Sun*, as of the *Moon*, into twelve equal parts, which they call *points* or *Digits*, and the more *Digits* the *Eclipse* is, the greater is the *Eclipse*: yet in the *Eclipses* of the *Moon*, we must know that the *Diameter* of the *shadow* is far greater than the *Diameter* of the *Moon*; hence the *Moon* being in the middle of the said *shadow*, which answereth the *Ecliptique* line exactly, the whole body of the *Moon* is not only obscured twelve *Digits*, but the obscuration is enlarged much, by plunging (as it were) of the *Moon* into the said dark *shadow*, and her long continuance there; and therefore in *Lunar Eclipses*, we reckon the number of *Digits*, according to the quantity of the *shadow* of the *Earth*, which may sometimes extend to almost 23 *Digits*—

But as to the *Effects* of this *Lunar Eclipse*, in *November* this *Year*, 'tis not my design at this time to treat of: for in regard the said *Eclipse* happens so near unto the end of the *Year*, its *Effects* will not appear to any purpose, until the next *Year*, viz. 1686— in my *Observations* of which *Year* (if God shall enable me to write thereof) I shall speak the same at large; for seeing it is a very great and considerable *Eclipse*, its *Effects* will probably be as great and considerable the rather, because it is attended with some very important *Configurations* of *Heaven*— I shall therefore now here put an end to my *Observations*, on this present *Year*, 1685. and in that the *Stars* in this *Year*, do seem to have some very material signification, as in relation to the *Affairs* and *Transactions* of some *Foreign Countries*: and many matters of consequence may be carried on, in sundry places beyond the *Sea* in this *Year*, and earnestly managed both in *Europe* and *Asia* (for so the *Heavens* declare:) and much *Action* may happen betwixt the *Christian Armies* and the *Turk*. God grant it may be a propitious *Year* unto all *Christendom*—

Pax est dulcissima rerum.

Postscript

Postscript to the Reader.

I suppose it may be expected, that I should have said something concerning the late violent and tedious Frost, in the Months of *December* and *January* in 1683. last past, as being the greatest this Age hath beheld; especially, because few or none of our *Annual Writers* hinted any thing material beforehand concerning it. The truth is, when I was writing my Observations of the Weather in the aforesaid Month of *January*, in my last Years *Almanack*; I did foresee, by the *Configurations* of *Heaven* in that Month, that much Cold Weather, would then happen (as I did then intimate) and much Snow; inasmuch, that I altered my *Observations* of the Weather in that Month (before my Copy went to the Press) no less than twice or thrice, because of the difficulty of the Weather, which I then found signified: But as to the great and long continuance of the Frost it self, I did not foresee, though there were some reasons in Art, which I have discovered since, might have given some light beforehand into the same—— There is a Book lately published, called the *Siamus Tutor*, a pretty piece, explaining *Geometry*, *Cosmography*, and *Trigonometry*, with divers requisite Tables of *Longitude* and *Latitude*, of *Sea Ports*, traverse Tables of *Eastings* and *Westings*, &c. compil'd for the *Mathematical School* in *Christ's Hospital*, *London*, to be sold by *Obadiah Blagrave*, at the sign of the *Bear* in *St. Pauls Church-Yard*, where also is to be sold Mr. *Blagrave's* Introduction to *Astrology*, and Mr. *Mays* Practical Gauger, being of great use for those that have occasion for Books of those Natures——

ADVER-

scrip

ADVERTISEMENTS.

Ruptures or Broken Bellies.

PResent help for Men, Women, or Children by a Traveller famous in *Germany* and other Countries for his practice this five and twenty Years; and maketh all sorts of Trusses easie, no such made in *England*, as these be found by experience. He helps those at a distance, as well as Directions, as those in *London*, and helps those that cannot hold their Water, or bearing down their Privy parts, and maketh strait Stockings. The Poor have advice for nothing. Take it in time. By *R. Collins*. From Nine to Twelve at the *Bell and Naked Boy* on the Ditch-side at *Fleet-Brick*. The Afternoon at the *Bell* in *S. Joans* Court *Clerkenwel* Parish.

THE true, Plain, and Golden Spirits of *Scurvy Grass*, being highly approved for the Admirable Cures in the *Scurvy*, *Dropsie*, and several other general Distempers; are still fully prepared as formerly by *Mr. Robert Bateman*, and sold by him at his House in *Pauls Church-yard* near *Doctors Commons*, *London*, and at many eminent Towns in the Country; they are also now had with printed Directions for their use. The Bottles are sealed with his Coat of Arms, a half Moon and Ermins, to prevent Counterfeits. Price one Shilling the Bottle. These Spirits of *Scurvy Grass*, prepared by *Mr. Bateman*, are very effectual Remedies for the aforesaid Diseases which I can affirm upon my own Tryal and Experience.

William Anderson
